Note submitted to the Honourable Mr.B.G.Kher, the Premier of Bombay by the District Local Board,Dharwar.

---

Village Water Supply.

1. The Honourable Premier started the Village Water Supply Scheme on 30-9-1946 at Hosalli in Dharwar District. Immediately after that the work of preparation of plans and estimates as well as that of execution was taken in hand by the District Local Board. It was found necessary to employ separate staff for the execution of these works and hence the Board created three Sub-Divisions from January 1947. The staff had to engage themselves for the preparation of plans and estimates. The actual expenditure can only be seen after the plans and estimates are sanctioned by the competent authority and the works are started. In actual working we find certain difficulties which may kindly be solved by you.

2. Approval of Village Water Supply Works:

According to the instructions from the Chief Engineer under his No.322/46/W dated 6-8-1946, the list of Village Water Supply works is to be approved by the Collector. Lists of works to be undertaken during the year have been submitted to the Collector for each Taluka in the month of July and August 1947, but so far the Collector has been pleased to approve the works in Ron and Hubli Talukas.This approval was received on 29-10-1947. The list of works for Dharwar, Ranibennur, Hirekerur, Haveri,Navalgund,Gadag Talukas and Nargund and Mundargi Pethas are still awaited. We submit our list after careful consideration and we, therefore, submit that the approval should not take more than a fortnight at the most.

3. Administrative Sanction of Superintending Engr.

(1) A list of plans and estimates of about 60 wells was submitted to the Superintending Engineer for Administrative approval in the month of July. But even when we sent our staff to Superintending Engineer's office to comply with the remarks raised by the Superintending Engineer, it took nearly two months to get his administrative approval.We request that some type estimates should be sanctioned by the Government and the approval of plans and estimates should not be delayed more than a fortnight.

(2) The necessity of a draw well or a tank is again questioned by the Superintending Engineer after the same is approved by the Collector. The Collector approves the list from his own knowledge and from the circumstances,I think it is superfluous to make enquiry again by the Superintending Engineer about the necessity or otherwise of a particular work. A draw well at Halkeri in Ron Taluka is approved by the Collector. The Board prepared plans and estimates for the same and the Superintending Engineer has disapproved the same on the plea that there are two wells in the village. This village has a population of 2,361 according to 1941 census and as such another well was found quite essential and hence it was sanctioned by the Collector.If the proposals of the Collector are to be turned down even provisionally by the Superintending Engineer.

(3) We should know whether the plans and estimates should be prepared after the Superintending Engineer sanctions the proposals so that our expenditure and labour for the preparation of plans and estimates should not be wasted.

(4) Elaborate plans and estimates for repairs to village water supply tanks could not be prepared by the Board and hence the Chief Engineer was requested to spare two Overseers (D.C.E) but the request has not been accepted.In view of the urgency of the problem of solving this question of Village Water Supply the Superintending Engineer may be ... to spare two experienced hands forthis most important works...

works and the charges of this staff should be borne by the Government.

4. Supply of Cement:

We have placed an order for supply of 9 waggons of cement to the Cement Marketing Company under this office No.V.W.S.S.348 of 21-2-1947. The requisite amounts were credited on 9-5-1947 and 6-8-1947. But so far not a single bag of cement is received by the Board. The Government P.W.D. are receiving their quota at least partially for their works, the merchants are receiving their quota month by month but our Board is not able to receive anything even though the cement is required for Village Water Supply works which are given first priority. The masonry works of wells are at stand still for want of cement.The very well which the Honourable Premier was kind enough to start could not be completed for want of cement. It is true that there is dearth of cement, yet we should get our quota, at least that, which was ordered about 9 months before, In fact these works being works of 1st priority should have constant supply of cement. We may further state that wherever possible we are using lime but that cannot be done at all places and it is not possible for villagers to prepare lime. Further these werks are for water supply and if lime is not of requisite quality, the works would not be sound.

5. 2½% charges for the preparation of plans and estimates:

A representation was made to Government by the conference of the Presidents of the District Local Boards called by the Chief Engineer at Poona for giving to the District Local Boards' 2½% charges for preparation of plans and estimates of village water supply works in addition to the over-head charges. In G.R.,H. & L.G.D.,No.S-92 of 29-8-1947 it has been stated that these charges should be paid on the cost of execution of each work. It may please be noted that these charges are incurred for the preparation of estimates by employing special staff for the same. Whether a particular work is executed or not the charges incurred for preparation of plans and estimates should be paid to the Board.In fact the special staff employed by the District Local Board, Dharwar has worked mainly for the preparation of plans and estimates and the Board has been able to submit 149 estimates so far out of which 126 have been approved by the Superintending Engineer. It will take long time to complete all these works but as the work of preparation of estimates has been already done and as the Superintending Engineer has already approved the same, charges for the preparation of estimates should be immediately paid to the Board.The G.R. should be ammended immediately.The 2½ % should not be taken on the cost of work as it is meant for preparation of estimates and the Board is entitled for 2½% as soon as the estimates are approved by the Superintending Engineer.

6. Over-head Charges:

Government have been pleased to sanction only 10% over-head charges for the execution of the Village Water Supply works entrusted to the Board. In the every first meeting called by the Chief Engineer on 29-7-1946,the President of the Dist.Local Board had pressed the point that all the expenditure incurred by the District Local Board for extra establishment for the Village Water Supply works should be borne by the Government.In executing these works, there are special difficulties as the works are situated in different villages spread long and wide. The Chief Engineer although has said that over-head charges should be paid upto 15% to the Board, the Hon.Minister for Reconstruction has ordered that in the first instance only that 10% should be paid.This shows that he agrees with the Chief Engineer. As per our experience so far that the establishment charges have exceeded far above.We are, therefore,...

therefore requesting you to at least sanction immediately 15% as per report of the Chief Engineer and further charges should be paid after the actual figures of expenditure are known after a year or so.

7. Progress of Village Water Supply works:

95 wells and 19 tank works are at present under execution. Seven wells have been completed in all respects. The works of constructing and steining works for 15 wells is in progress. The works are however held up for want of cement. In case of remaining 73 well works, excavation has been completed in certain cases, while it is in progress in other cases. Potable water has been tapped in cases of about 30 wells. If cement is made available the progress of these works will be markedly seen. Further 33 estimates have been sanctioned by the Superintending Engineer and the villagers are being contacted for undertaking these works. 22 estimates are pending with the Superintending Engineer pending his administrative approval. There is an expenditure of Rs.1,98,000 so far but the progress will be very slow if cement is not made available immediately. We have sincere desire to complete a large number of wells. If proper co-operation and sympathy is forth-coming from officers and if cement is given, we can say with confidence that we shall show remarkable progress. Our enthusiasm is damaged and we are handicapped at every stage. We are now working against odds.

8. Prompt payments:

As most of the works are entrusted to the villagers, immediate and quick payments have to be made from time to time. The official routine procedure takes ordinarily about a fortnight for paying the bills. As in case of P.W.D., the Sub-Divisional Officers (Deputy Engineers and Assistant Engineers) should be authorised to make payments to the contractors directly which can be recouped pn due course. Necessary order may please be made. We suggest that the sub-Divisinnal Officer should be given an advance of Rs.10,000 by the Board which should be recouped from time to time and the Sub-Divisional Officer should be authorised to make payments from the amount kept in approved banks.

School Buildings:

9. On 28th of October 1947, the meeting of District School Building Committee was called by the Educational Inspector. A number of proposals for School Buildings were discussed. It is intended that at least about 20 buildings should be undertaken for execution during the current year. In view of urgent needs of the villagers, it is of course very desirable that these buildings are constructed as early as possible. We would therefore request you to give necessary facilities for the construction of these buildings.

In case of these buildings also, necessary quantities of iron and cement should be made available. As the Government have spared necessary quantity of wood for their buildings from Forest Depot, they spare the same for school buildings. At present the Board has to pay exhorbitant rates for the same.

I.B.(II).

Resubmitted.

2. Para. 1 of the Note submitted by the D.L.B. Dharwar: No remarks are called for on this para.

3. Para. 2 (ibid): Appl:. of village water supply works: Necessary action on this para. will have to be taken by the H.& L.G.D. as it is the administrative Deptt. for these schemes.

4. Para. 3 (ibid): Administrative sanction of S.E: Re: sub-paras. 1 and 2, please see this Deptt. office note dated the 27-11-47 on the H.& L.G.file No.S-92/32829/50328. From that it will be seen that a proposal to accord administrative appl. by the local officers within 15 days after the plans and estimates are recd. in their offices, is already under the consideration in the H.& L.G.D. In view of this, no further action is called for on these papers by this Deptt.

Sub-para 3 is for the H.& L.G.D. to consider and issue orders in the matter.

5. Para 5 and 6 (ibid): 2½% charges for the preparation of plans and estimates and overhead charges. It is for the H.& L.G.D. to consider the requests of the D.L.B.

6. These papers may be shown up to the H.& L.G.D. before their submission to the H.M., P.W.D.

Thro' E.B.(II), Con.B., W.B., A.B.(I).

MB/9/12/47.

7. Para 3(4) ibid:- There is a shortage of Overseers in this Deptt. and it is doubtful whether the S.E., S.C., will be able to spare two experienced subordinates for the D.L.B. The President of the Board may be asked to address the S.E. direct whether he can spare the subordinates for the Board. If the subordinates are spared by the S.E., their cost will have to be borne by the Board, which is paid percentage charges by Gov

for

for the works carried out by it on behalf of Govt.

VMW.
10/12/47.

10-12-47

121 ₹ 1.23

8. Paras. 4, 7 and 9 ibid. The D.L.B. states that the masonry works of wells are at a standstill for want of cement as not a single wagon of cement out of the 9 wagons has been received by the Board. In this connection it may be stated that out of a quota of over 10,000 tons sanctioned for this Deptt during the last qr. of 1947, hardly any cement has been received and urgent works like construction of Dharwar College bldgs. have been held up. For this reason Govt. has issued instructions to all concerned not to undertake any works involving the use of large quantities of cement. Even bldgs. are, as far as possible, to be constructed in lime mortar instead of cement. In view of the great dearth of cement, this Deptt. will not, it is feared, be able to spare any cement to D.L.Bs. However, the D.L.B., Dharwar may be requested to approach the Ex.Engr., Dharwar Dn. for the loan of the required quantity of cement. Govt. has in this connection informed all Dist. Matistrates to assist the parties concerned in obtaining the necy. authorisation from the R.H.C.A., Bombay.

BKR
11-12-47.

12/12/47

9. Para. 8 ibid. The suggestion of the D.L.B. that the S.D.O. should be given an advance of Rs.10,000 by the Board, which should be recouped from time to time and the S.D.O. be authorized to make payments from the amount kept in the approved banks may be accepted. The powers of the S.D.O.s for making payments for work done should, however, be similar to those of the S.D.O.s in the P.W.D. These are generally restricted to Rs.1000/- on running account bills, (subject to the proviso that no subsquent bill is paid till the first one is prequdited), and Rs.500/- on first and final bills.

MDL.
17-12-47.

Sec (I).

Regarding expediting the grant of administrative approval to the village water supply works, the Secretary (Irrigation) had, in another reference received from H & L.G.D., stated that "once the type designs for wells are ready, it will not be difficult to accord both administrative and technical sanctions within 15 days ".

2. It is desirable that the D.L.B.takes up the work of preparation of plans and estimates for village water supply works, after the Collector of the District and the S.E. concerned ~~considered~~ agree to their necessity.

3. I doubt very much whether two overseers can be spared from the P.W.D. as requested by the D.L.B., Dharwar. If this principle is once accepted, each and every D.L.B. will come forward requesting for the services of overseers. Incidentally the P.W.D. is finding it very difficult to recruit sufficient number of overseers and has therefore amongst other reasons started taking up suboverseers. It is, however, for Govt.to decide the policy to be followed in this and similar cases.

4. The acute shortage of cement is felt everywhere including the P.W.D. If desired, the Regional Honorary Cement Adviser can be asked to give special preference to D.L.Bs.,asking for cement for village water supply works.

5. The D.L.B's request to get 2½ % charges,for the preparation of plans and estimates,on sanctioned estimates is reasonable and may be considered favourably by the H.& L.G.D.

6. Regarding payments and the proposal of the D.L.B. to give an advance of Rs. 10,000 to each of their Sub-divisional Officers who are to be authorised to make payments from such amounts kept

in

in approved banks, I have no remarks to make.

BKR

~~D.B.S~~ 18/12/47

Scarp(1)

Para 2 of the DhB's representation – The collector has to call a meeting of the RDB to fix the priority of wells & this naturally takes time. However the collector may be expected to accord his approval

Para 3 (i) Type plans have been drawn up & are being examined & will then be printed in the Govt Photo Zinco Press & will be supplied to all concerned

3 (ii) Normally this should not happen but apparently the SESC must have acted upon the necessity for a third well being established

3(iii) Plans & estimates should be prepared & submitted for their approval. Cases of the type mentioned in 3(ii) are likely to be rare & this should not stop preparation of plans & estimates.

3 (iv) The overseers cannot be spared.

Para 5. This may be agreed to.

Para 6 Actual expenditure by the various Boards will have to be ascertained before according to the request for an increase in the ~~rates~~ percentage of overhead Charges.

Para 7 Everything possible is being done to help the DhBs in the ~~Supply of Cement~~. The PWD ~~has~~ has no control over the supply of Cement.

Para 8 This is another, ~~of procedure~~ which will need further investigation. The PWD SDOs' powers are limited to what has been stated on page 28. I do not see why the SDOs need the special powers asked for.

No.S.92(16)/31992-M.
Health and Local Government Department.
Bombay Castle. 14th January,1948.

To,
The Collector of Dharwar.

Subject:- Village Water Supply Scheme.

Dharwar District.
Administrative approval to the plans and estimates for constructing draw wells in 2 villages of Ranebennur Taluka and one in Kod Taluka of Dharwar District.

I am to forward herewith a copy of a letter from the Superintending Engineer,Southern Circle,No.G-116/A/1 dated 5th April,1947,and to state that administrative approval to the two works at Antrawalli,Taluka Ranebennure, and Holbikond,Taluka Kod,in Dharwar District has been accorded under Government Resolution,Health and Local Government Department,No.S.92(16)/ dated January,1948.

2/- As regards constructing a draw well at Kunbev Taluka Ranebennur,it is found from the data sheet attached to the estimate in respect of this work, that the population of this village in 381 and the cattle population is 210.There are already two sources of water in this village and the justification given for the proposed well is that it will be necessary if the Gaothan is shifted.In the circumstances please state what is the probability of Gaothan being shifted and what will be the distance of the new Gaothan from the existing sources of water supply and whether a new well is quite essential.

Forwarded herewith: To be returned please.

3/- Please return the plans and estimates along with your reply through the Superintending Engineer,Southern Circle.

Sd/-M.J.Mulekar,

Assistant Secretary to the Government of Bombay
Health and Local Government Department.

---

No.S.92(16)/31992-M,
Health and Local Government Department.
Bombay Castle, 14th January,1948.

Copy forwarded to the Superintending Engineer,Southern Circle,for information.

2/- In case the Collector recommends the work at Kanbev the Superintending Engineer is requested to revise the plan for the work in the light of the following remarks made by Public Works Department,and pass them on to Government through the Public Works Department:-

"(1) The cattle though and washing platform are sited too far away from the well and will never be used.They should be close to the well.There is no harm in doing so as long as a pucca gutter is provided to carry away the waste water to a safe distance from the well.

(2) The gutter leading to the soak pit should not be less then 6" deep and 6" wide"

3/- The plans for the wells proposed for ~~Anthwalli~~ Antrawalli and Holbikon should also ~~hes~~ be revised in accordance with the above remarks.

By order of the Governor of Bombay,

Constructing a draw well at Uppinbetgeri Village, Taluka Dharwar.

Government of Bombay,
Health and Local Government Department.
Resolution No.S.92(16).
Bombay Castle, 28th January, 1948.

Letter from the Superintending Engineer, Southern Circle, No. G.116-A/2 dated 30th September, 1947.

The plan and estimate, the latter amounting to Rs.7,770/- for constructing a draw well of 10' diameter 45' deep at Uppinbetgeri village taluka Dharwar are submitted herewith for obtaining the administrative approval from Government.

2/- I am requesting the District Local Board President, Dharwar to adopt C.R.stone masonry in cement mortar for steining instead of R.C.C. rings if possible, as cement is not available now-a-days.

3/- So also, through bores at three places are proposed in the estimate, I am requesting the President District Local Board, Dharwar to take not more than two bores thereby curtailing the expenditure as far as possible.

4/- This work is approved by the Collector of Dharwar. I am therefore requesting the District Local Board President Dharwar to start the work in anticipation of Government approval, which may please be approved.

5/- The general remark made by the Deputy Secretary to Government in Public Works Department on 29th April 1947 on the plans and estimates of wells have been complied with.

2. The S.E., S.C. has forwarded p's pp 1-26 & etc the latter amounting to Rs 6,090/- for the construction of a well at Devigihalli village, Sal. Hal, for admin. appol.

3. The admin dept concerned is the H.W.L-C.D. and necy orders will have to be issued by that Dept. These papers pp 1-26 may therefore be forwarded to the H.W.L.C.D, for necy. action as per draft p 39 but up for appol.

Thro' A.B.(II) and D.E.(I)

QB 6/12/47

The strata provided in excavation is kalak, average and hard. Kalak, a special variety of rock in Dharwar Dt., is not as hard as trap. The rate provided for excavation in kalak for a depth 41' to 5-1'-6" is Rs 44 per 100 c.ft. The rate is considered a little on the higher side but may be allowed in consideration of the high lift and restricted space of excavation. (12' dia.).

The masonry steining is carried right to the bottom of excavation. It is not clear whether the material will not stand the weathering and whether it is not possible to stand the steining at a higher level with a wooden curbing at the bottom, if necessary.

Subject :- Constructing a Village Water Supply well at Devgihalli village, Taluka Kod, District Dharwar.

U.O.No.G-116/A. Public Works Department, Belgaum, 4th February '48.

Resubmitted to Government in the Public Works Department, Bombay.

2. Even the hard katak expected to be met with is not likely to stand weathering action. In some places, it is seen to soften appreciably in contact with water. It is not considered desirable to rest the masonry steining on the uncertain nature of stratum. However, the President, D.L.B., Dharwar, may be asked to take this point into consideration at the time of actual construction. It is requested that administrative approval may be accorded to this work with this direction.

B/2/47

The proposals are for repairing an old well The steining of which is falling off due to the lower ~~stal~~ strata caving in badly. The proposals are not very sound. There is no indication of the nature of strata behind existing steining. If that is not compact it is just possible that it would collapse into the well. So for safety of the work people it seems necessary to ascertain this strata & provide stable slopes of excavation. Incidentally it will raise the cost a good deal: Not only the overburden will have to be removed but the large depth will have to be excavated with stable slopes & subsequent filling. The estimate may be returned to the S.E.-S.C. for consideration & resubmission.
Sd/- (10/12/47)

Hyd. 3 ✓

This is mentioned as "loose soil" DBV

The lower strata is shown on the blue print as "loose soil collapsing". Obviously strong shoring and shuttering would be necessary before the well can be deepened. In view of the great depth, giving stable side slopes is out of question and shuttering & strutting appear to be called for. The S.E. S.C. should please scrutinise the proposals once again & modify them suitably before submission to Govt.

Below Government U.O.R.(P.W.D.) No.8122/36 51709 dated the 15th December 1957.

***

Subject:- Village Water Supply Works in Dharwar District: Reconstructing the Oli-Basappa's well at Hebballi Taluka Dharwar.

U.O.No.G-116/A. Public Works Department, C.V.Belgaum, 15th March 1948.

Resubmitted to Government in the P.W.D.,Bombay.

2. The existing well is about 61 feet deep. The strata met with as shown in plan are " Katak" to a depth of 30 ft. from ground level and "loose soil collapsing " from 30 ft. to 61 ft. depth. It is shown further that " Hard Matti" stratum will be met from the depth of 61' - 6" and below.

It is proposed to deepen the well to have a total depth of 70 feet. The steining work will commence from a depth of 61' - 6".

3. With regard to the remark made in the P.W.D. Secretariat noting, the Engineer, D.L.B., Dharwar was referred for his remarks. He states that the well pit will be widened sufficiently to a depth of 61' - 6" and the masonry steining work completed upto ground level and further deepening will be done by under-pinning. Hence he considers that shoring and strutting will not be necessary. So, the estimate will not require modification on this account. However, the Engineer, D.L.B. is being asked to eludidiate further the method of underpinning proposed by him.

4. In view of the increased powers of administrative approval delegated in G.R.,(H. &. L.G.Deptt.) No.S-92, dated the 12th January 1948, the plans and estimate will be approved administratively by this office after consulting the Collector of Dharwar as to the availabilit of funds for the work in a-ccordance with para 2 of the G.R. referred to herein.

5. The project papers pertaining to this work are, therefore, retained in this office.

Sub: IV Reply to no. G.22 dt 18.10.1932 from the Ex Engr Dharwar Dn.

Sub:- Statement showing modifications in the grants on account of grants-in-aid to D.L.Bs & Municipalities for works executed by the P.W.D.

No. G.22/1

Belgaum 4 October 1932

The Executive Engr is informed wpo that the additional amount of ₹ 3/- required for grants-in-aid in respect of "C.R. to the Ferry Boat at Hesrur" can ~~should please~~ be met from the saving of ₹ 14/- against the work of "Entertaining a Tandel for the Ferry boat at Chitachgud". A Re-appropriation of funds to that extent should please therefore be suggested & the remaining saving of ₹ 11/- surrendered at the same time.

2 The S.E., S.C., has submitted p's and e's for wells in two villages of Dist Dharwar, for admin appvl.

3. As the H. & L. Gr. D. is the admin. deptt concerned with V.W.S. works, these papers may be forwarded to that deptt for necy. action as per draft put up for approval. 1'N

Thro A.B.(II) and D.E.(I).

8/12/47 Secretary 6/12/47 A/S

Regarding the well at Kolemachiji the following points may be noticed.

(1) The plan and the estimate show different dimensions for depths and dia. of the masonry steining. This requires to be reconciled.

(2) The steining is carried through 19' of hard rock at about 89' below ground level. The idea for the purposes needs to be explained. The high rates for ex. in rock should be justified with details

(3) The steining ring has a dia. of 14·75" (mean) for depth from 47' to 89' and 13·75" dia. from 0' to 47'. As far as is known the lower reaches of steining have ~~bee~~ a smaller dia. than the upper reaches. In a type design it was common to have 7'·0 dia

in rock excavation below the portion with masonry steining which was constructed with 8' dia. Thus offsetting inside the well does not seem to be objectionable. This will save both excavation & masonry both to some extent. In the present case also there will be an offset at 8 90' where the dia. of excavation in rock is 12.0 ft.

These points may be considered while giving adm. approval.

10/12/47

The estimate shd be returned to S.E & C for further consideration
